

vMOBILITYSM

THE ALL-IN-ONE MOBILE APP FOR NEAR REAL-TIME AWARENESS AND COST CONTROL

Easily connect to familiar vMOX OnePortalSM features and functionality while on the go

Inform Your Employees

Near real-time, detailed reporting including talk, text and international consumption versus capacity, company policy and historical usage. vMOBILITYSM also predicts usage for the bill cycle, providing alerts for actual and potential overages.

Ensure Billing Accuracy

vMOBILITYSM monitors consumption* on the device, enabling us to audit the provider's billing for accuracy, ensuring you only pay for actual usage.

Prevent Unexpected Charges

vMOBILITYSM's geolocation/geofencing functionality proactively identifies devices traveling out of region/country, protecting against costly international roaming charges.

*vMOBILITYSM only monitors overall data consumption, and does not view or analyze the contents or source of any SMS, email, or web browser usage data. Data is generally updated hourly where available.

The vMOBILITYSM app is available at no extra charge and can be installed on iOS devices running iOS 12 or later, or on Android devices running Android 5.0 or later.
